XM1 SUPPRESSED PCP AIRGUN COMBO – REALTREE EDGE
.22 CAL, 1000 FPS
(Includes 4 x 32 mm scope)

- A.** Interchangeable cheekpieces aid in tailoring the fit of the XM1 to individual shooters.
- B.** Colored recoil-pad spacers adjust length of pull and customize the fit of the air rifle.
- C.** Pistol-grip pieces are interchangeable for a custom fit by adding or reducing palm swell.

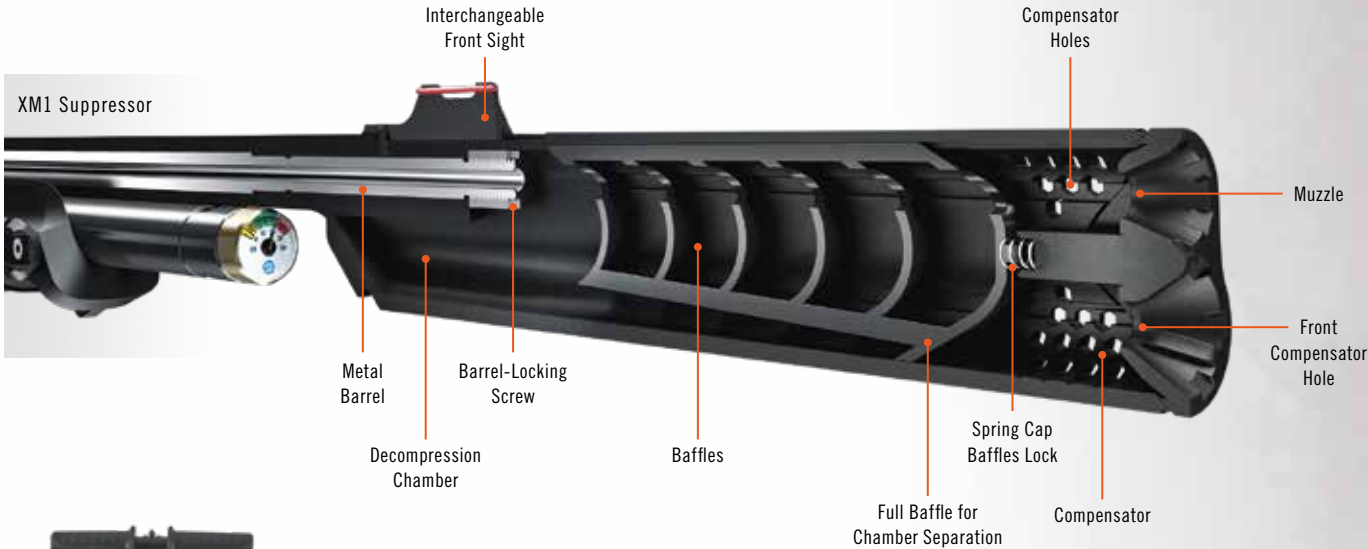

The XM1 air rifle demonstrates Stoeger’s commitment to innovation and cutting-edge technology. It offers superior performance and accuracy with futuristic style. Engineered with exceptional ergonomics, the XM1’s weight, balance and sleek profile team with interchangeable cheekpieces and pistol grips and an integrated suppressor to deliver unparalleled shooting comfort. The onboard air reservoir allows multiple shots to be made at consistent velocities between air charges – no pumping between shots. The XM1 comes with fully-adjustable fiber-optic sights and combo versions include a 4 x 32 mm scope.

XM1 AIRGUN STANDARD FEATURES

- VELOCITY:** .177 Cal. up to 1200 fps muzzle velocity with alloy pellets
.22 Cal. up to 1000 fps muzzle velocity with alloy pellets
- ACTION:** Pre-charged pneumatic
- TRIGGER:** Two-stage, adjustable length of pull
- SAFETY:** Cross-bolt
- FINISH:** Realtree® Edge™ Black synthetic
- PROADAPTIVE CHECKERING**
- MULTI-GRIP SYSTEM:** Interchangeable pistol grip pieces for custom fit
- FRONT SIGHT:** Interchangeable red and orange fiber-optic inserts
- REAR SIGHT:** Fiber-optic, fully adjustable for elevation and windage
- SCOPE:** Includes 4 x 32 mm scope (Combos ONLY; scope not factory mounted)

PCP AIRGUN HAND PUMP
Item # 30387
\$149

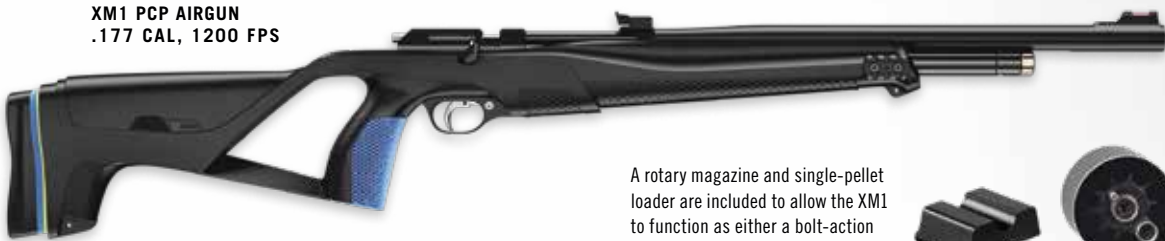

EBL (ergonomic bolt lever) is the first lever with exclusive THRIDION checkering for maximum grip.

The left-side Picatinny rail extension contains locking magnets to offer storage for up to three additional rotary magazines (extra magazines not included).

The XM1’s removable air gauge cover offers a quick way to check remaining air pressure in the air rifle (cover not included on non-suppressed models).

XM1 PCP AIRGUN
.177 CAL, 1200 FPS

A rotary magazine and single-pellet loader are included to allow the XM1 to function as either a bolt-action repeater or a single-shot air rifle.

A. Each Bullshark comes with two rotary magazines and is available in .177, .22, and 25 caliber.

B. Interchangeable pistol-grips enhance the fit by adding or reducing palm swell.

C. Attach military-style front vertical grip for added control and maneuverability, or use the flush-mounting plate as desired.

The XM1 Bullshark air rifle leaves no doubt that Stoeger leads the world in airgun innovation. Its groundbreaking bullpup configuration combined with an integrated suppressor, virtually no recoil and Olympic-grade accuracy (using premium pellets) delivers a whole new level of compact handling, maneuverability and performance. Adjustment features include recoil pad spacers, cheek pieces and grips to ensure a custom fit, and advanced ergonomics provide optimal shooting comfort. A two-stage, adjustable trigger enhances accuracy. Picatinny rails on the top and side for optics and lights. Step into the future of airguns with the XM1 Bullshark from Stoeger.

XM1 BULLSHARK AIRGUN STANDARD FEATURES

VELOCITY: .177 Cal. up to 1200 fps muzzle velocity with alloy pellets / 970 fps with lead pellets

XM1
SCOUT

Taking Stoeger's innovative XM1 full-size airgun platform to more compact dimensions, the all-new XM1 Ranger and XM1 Scout models satisfy the go-light, go-fast criteria of today's hunting airgun enthusiasts. Boasting a shorter overall length than the original XM1, the XM1 Ranger (43.2-inch OAL) and the XM1 Scout (37.7-inch OAL) sacrifice nothing in terms of ergonomics and performance. With their fully-adjustable stock system (LOP, cheek riser height, grip) and trigger pull weight, these PCP airguns ensure a custom fit for shooters of all sizes as well as for seasonal changes in clothing. Powered by a 200cc tank, capable of up to 1,000 fps*, and boasting a high-capacity rotary magazine for fast, reliable chambering, the XM1 Ranger and XM1 Scout cause steel targets, pests, and small game to shudder!

XM1 SCOUT AIRGUN STANDARD FEATURES

- ACTION:** Straight Pull
- TRIGGER:** Three lever - Adjustable from 0.6 to 0.35 Kg
- SAFETY:** Manual on trigger
- FINISH:** Black synthetic
- MULTI-GRIP SYSTEM:** Interchangeable pistol grip pieces for custom fit

Interchangeable cheek pieces team with recoil-pad spacers to customize the XM1's fit to individual shooters for optimal shooting comfort.

S4000-E SUPPRESSED AIRGUN COMBO – REALTREE EDGE
.177 CAL, 1200 FPS & .22 CAL, 1000 FPS
(Includes 4 x 32 mm scope)

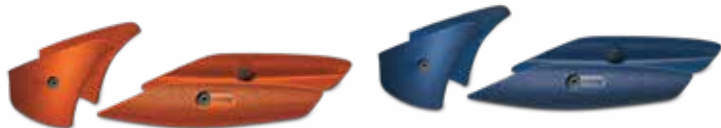

Stoeger introduces the next generation of airgun technology in its fast-shooting, hard-hitting, yet quiet S4000-E. It comes with multiple features to customize the fit and feel, including MGS and ProAdaptive Checkering technologies. The integrated S3 suppressor dramatically reduces shot noise. A recoil-absorbing buttpad makes shooting a joy. Other features include an ambidextrous safety, adjustable two-stage trigger, and interchangeable fiber-optic bars for the front sight. The rifled barrel teams with the included scope to deliver impressive accuracy shot after shot. Step into the future of airguns with S4000-E.

MGS
MULTI GRIP SYSTEM

Multi-Grip System lets shooters adapt their air rifle for personalized style and shooting comfort. Choose between an embossed grip or Stoeger's innovative ProAdaptive Checkering.

PROADAPTIVE
CHECKERING

ProAdaptive Checkering is the most versatile, efficient and innovative stock checkering available. It allows shooters to feel like the airgun is a natural extension of their bodies, resulting in quick, instinctive aiming and enhanced shooting comfort. The unique checkering progression actively and comfortably "fits" the gun to the shooter in any weather or shooting venue.

S4000-E AIRGUN STANDARD FEATURES

Recreational

Pest Control

Small Game

As any airgun diehard will tell you, underlevers offer a number of substantial advantages over break-barrels. These advantages are perfectly embodied in the Stoeger S6000-E airgun. First, this design offers perfect rigidity between the barrel and the receiver, which affects accuracy positively. Then, there is considerably less wear to the airgun's most important part—where the barrel meets the receiver and at the hinge-pin. Also, the extra weight of the cocking lever is ideally placed under the barrel, making the rifle steadier in your hands when you shoot. Try the S6000-E yourself—it will make you a fan.

UNDERLEVER
COCKING

The S6000-E has a fixed barrel, which means that every shot is mechanically consistent with the next one. The underlever is long, requiring less effort to operate it. When not in use, the underlever locks positively under the barrel and adds balance to the rifle.

GAS-RAM
TECHNOLOGY

MGS
MULTI GRIP SYSTEM

Stoeger's Multi-Grip System lets shooters adapt their air rifle for personalized style and shooting comfort. Choose between an embossed grip or the innovative ProAdaptive Checkering.

The S8000-E TAC suppressed airgun features Gas-Ram technology, an Airflow Control (AFC) suppressor and a tactical synthetic stock with integrated Picatinny rails attached to both sides of the forend for mounting accessories. The action cocks with a break-open barrel and is driven by the efficient Gas-Ram system that reduces vibration and eliminates the sound that comes from a traditional spring-driven airgun.

The S8000-E TAC's Gas-Ram system has been thoroughly tried and tested for toughness and durability, and was chosen for its long-lasting reliability and ballistic precision. Accuracy is enhanced with this system through the elimination of vibrations, and velocities are consistent because of exact and repeatable gas-pressure release.

S8000-E TAC SUPPRESSED AIRGUN

ITEM NUMBER	DESCRIPTION	MSRP
